## PROJECTS

### put to vote

- This app is basically voting system.In that 3 types of user admin , manager and user.Admin can Manage all user and manager and analyse data.
- In this app i designed all the Ui.
- Basically i learned lots of thing from this project. how can we work in live projects and deal with structure.

### Mouth map

- It's a both web and mobile project.The Admin Panel is on the web and the user panel is on the mobile side.
- I had done design on the web panel for the admin(Responsive also).
- This project is based on the cleaning of mouth(teeth) with di erent di erent brushes as per the customer's requirement. In this application customer can have an idea what type of brushes are suitable for him/her & what type of dental product he/she can have to solve his/her problem.

### Lubi - Web

- This app is basically electric charging management system.
- In this application there are 3 types of users superadmin, business manager, location manager. Superadmin can create business and location and analyse data.

### SmartMD

- Smart MD is a pioneering healthcare platform with doctor and patient panels. Doctors utilize the intuitive Doctor Panel to create and manage their digital profiles, while patients benefit from a user-friendly Patient Panel, featuring a Doctor Card view for informed healthcare decisions.
